## WORK EXPERIENCE

---

**Epic** **August 2022 – March 2023**  
**Network Security Engineer** *Madison, WI*

- Built, maintained, and monitored firewalls for Epic Hosting: a large, multi-tenant cloud provider serving health systems and containing over 227 million unique patient records.
- Wrote detailed technical records for hundreds of infrastructure changes and dozens of security incidents.
- Led weekly training sessions to teach network security fundamentals to admins in different roles.
- Designed, developed, and documented software solutions to automate operational needs for a team of 10 engineers.

**Epic** **July 2021 – August 2022**  
**Software Developer** *Madison, WI*

- Designed, developed, and documented software features for Epic Rehab: an application relied upon by therapists in many inpatient and outpatient rehab facilities across the nation.
- Wrote detailed technical designs for broad audiences including software developers, QA analysts, project managers, UX designers, and more
- Interviewed end-users and SMEs to design user-centered features.
- Wrote comprehensive reports on 10+ high-impact bugs, focusing on their severity, likelihood, root cause, and end-user workarounds.

## EDUCATION

---

**The Ohio State University** **May, 2021**  
**B.S. Computer & Information Science** *Columbus, OH*

- Magna cum laude; 3.73/4.0 GPA
- Linguistics minor; computer networking specialization
